

Manpower Support for Assembly and Production

integrated training and skills solutions for aircraft production and assembly

Recruit, Train & Deploy

Fixed Price Work Packages

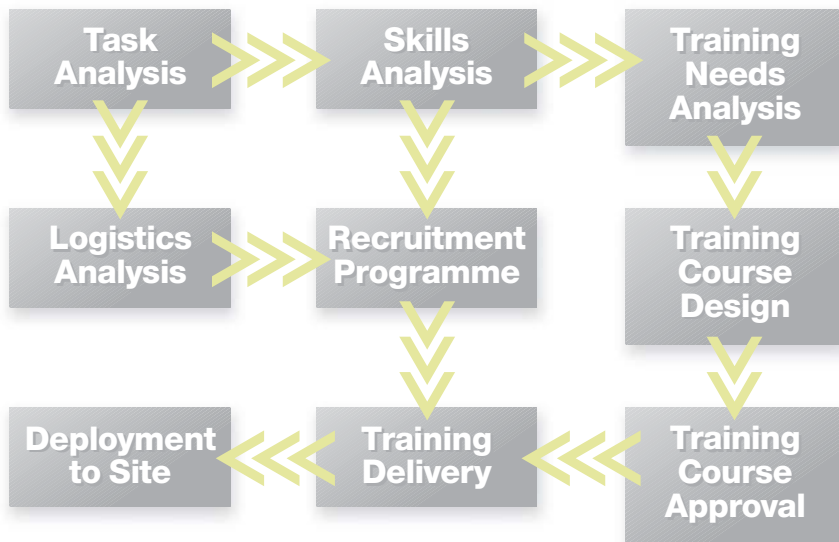

Recruit, Train & Deploy

Resource Group is unique in providing integrated manpower and training solutions to support aircraft production and assembly facilities. Where production demand is increasing or new products are being introduced, Resource Group can provide a total service package to provide short, medium or long term interim manpower to help manage the resource challenges that occur during periods of change.

Our recruit, train and deploy concept provides a risk inclusive approach to manpower delivery in this field. With this service Resource Group takes total ownership for:

- Skills assessment & gap analysis
- Interim manpower recruitment
- Bespoke training analysis & design
- Training delivery & assessment
- Manpower deployment & logistics

Our Recruit, Train and Deploy concept is shown below:

Fixed Price Work Packages

Resource Group have demonstrated their access to the best skills and bespoke training solutions to cover all skill deltas required by their clients. With experience in highly complex engineering packages, Resource Group are able to provide realistically priced work packages for aircraft assembly and production.

A|D|S Toulouse Membership

Resource Group are an active member of A|D|S Toulouse.

Resource Group offer fixed price packages across all aviation sectors, as well as specific areas that include:

- Electrical cable installation
- Interior completions
- Aircraft painting
- Equipment installation
- Flight line support

Work Packages for Production & Assembly

Work Package Management

Resource Group have a broad level of experience across MRO engineering and software and mechanical engineering in delivering complex programmes on time and to budget.

Skills to Implement Work Package

Resource Group have demonstrated time and again to clients that we can access the best skills and provide bespoke training to cover any skill deficits.

Efficiency in Delivery

Resource Group achieve efficient delivery through a highly skilled and motivated workforce. This is further derived from a flexible approach and cell-based structure.

Commercial Pricing

We have experience in costing highly complex engineering packages with a proactive approach to pricing.

Professional Insurances

Resource Group have extensive public liability and public insurance and aviation third party cover in place giving you peace of mind.

Bespoke Training Design

To support the deployment of staff for aircraft production centres, Resource Group work with Lufthansa Resource Technical Training (LRTT) to design & create bespoke training packages. This could include:

- Knowledge Training: Appropriate modules drawn from the EASA Part 66 syllabus
- Technical Training: Installation methods, system overviews, aircraft gen fam
- Skills Training: Electrical crimping, composite handling & specialised bonding
- Documentation: Drawings, local procedures, ERP systems
- Quality: Quality system overview, local quality procedures
- Health & Safety: local procedures & materials handling

Bespoke training courses will be designed in conjunction with corporate training departments to ensure training delivery is approved and meets all local requirements. LRTT training facilities can be audited to assure training quality. Training assessments can also be designed in conjunction with clients to ensure accurate testing of candidate knowledge and skills after training.

Training can be delivered on site at suitable facilities or at one of LRTT's approved training locations. All training logistics including travel and accommodation will be managed by Resource Group.

LRTT is an EASA Part 147 Approved Basic Training Organisation based in the UK. In addition to providing EASA Part 66 Category A1, A3, B1.1, B1.3 & B2 courses, LRTT also provides skill enhancement training such as composite repair, electrical hand skills, structural repair and legislative updates such as human factors, aviation legislation and EWIS.

For more information visit the LRTT website at: www.lrtt.co.uk

Production skills & experience:

Production managers

Manufacturing engineers

Focal point managers

Aircraft painters

Installation inspectors

Equipment installation team leaders

Aircraft electricians

Aircraft structural mechanics

Interior completions technicians

Flight line technicians
